# WWW WHO WHAT HOW

 “NOMAD” = **humanitarian Operations Mobile Acquisition of Data** and the project’s main aim is to *improve information management for humanitarian organizations by linking them with the latest mobile data collection technology* to improve collection, analysis and management of information.

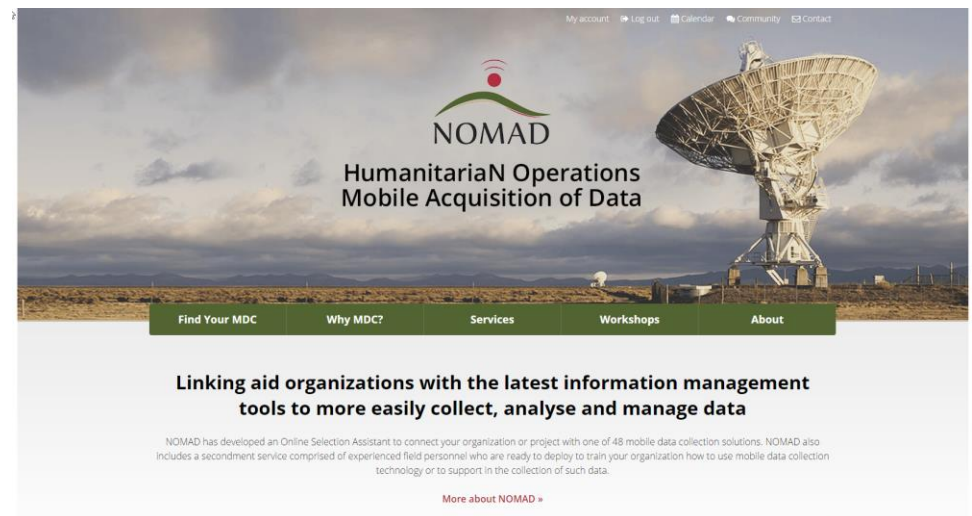

Using mobile phones and other gadgets to collect data helps aid agencies be more efficient, cost effective, information-secure and reliable. The team at NOMAD is made up of humanitarians who are experts in mobile data collection and information management.

**Linking aid organizations with the latest information management tools to more easily collect, analyse and manage data**

NOMAD has developed an Online Selection Assistant to connect your organization or project with one of 48 mobile data collection solutions. NOMAD also includes a secondment service comprised of experienced field personnel who are ready to deploy to train your organization how to use mobile data collection technology or to support in the collection of such data.
