

ABOUT US AND OUR WORK

Created in 2006, CartONG aims to provide services for the use of geographic information to NGOs and international organizations that engage in humanitarian interventions and development projects. Furthermore, we are continuously testing new methods and technologies (GPS, satellites, drones, etc...), aiming to give our partners the best means for their activities in the field.

WHAT DO WE DO ?

Support to key humanitarian actors on the management of geographic data, essential for their interventions.

Expertise in cartography, data management and geomatics in the Humanitarian sector and development aid.

Stands for data sharing in order to facilitate the interventions of NGOs, international organizations and governments.

Professional training in order to enable an open access to new innovating technologies.

Our mission is to improve the need identification phase in the field in order to respond in a more effective manner and propose lasting solutions, providing necessary training to local staff and communities.

17-18-19 OCTOBER 2016

GeOnG 2016 tackles the role of technology in the humanitarian sector. We invite you to be part of the most important conference on humanitarian cartography in Europe.

Plus, CartONG celebrates its 10th anniversary as an organization working for a better understanding and use of cartographic and technologic tools in the humanitarian field.

Join us and take part in a dynamic forum with the participation of more than 70 international organizations from the Humanitarian sector.

ENGAGE IN GEONG 2016

GeOnG is known to be the biggest independent conference on geomatics for the humanitarian sector in Europe, with the participation of more than 70 organizations and 140 participants. It is a great opportunity to address the use of new technologies for information management.

Engage in the discussion of GeOnG 2016

Contribute to the content and debate of a one-of-a-kind event in Europe.

- Bring to the table your ideas and proposals to help the understanding on pushing issues in the Humanitarian sector.
- Take part on the critical discussion undertaken by experts and key actors to tackle tomorrow's humanitarian challenges.
- Share your experiences with other organizations from the sector.
- Discover new projects and tools that can improve your activities.

In order to adapt to everyone's needs, we propose different types of partnership, going from a simple/one time intervention to a Platinum partnership, which brings different advantages and a privileged status in our organization.

GEONG

GeOnG proposes a programme that aims to discuss and engage its participants through many different activities, diversifying the interactions and approaches to topics. Roundtables and workshops are among the spaces destined to allow participants to understand and manage new tools.

In the past years, we have tackled issues such as the role of cartographic and geographic instruments (2008), the newest technologies for the recollection of data (2010), the challenges presented by the usage of *cloud* (2012), and the analysis of data (2014). For this year's forum, we want to focus on the impact of information management in the humanitarian sector.

In its past editions, GeOnG has positioned itself as an important platform to expose and discuss various ideas and subjects related to the use of cartography in dynamic and challenging fields.
