Lessons from the past, shaping the future

PLENARY SESSION

Taking into account this year's theme, we want to kick-start the debate on the evolution of technology for IM in the Humanitarian sector

With the intervention of a keynote speaker, we will open the discussion and start the conference with a general framework for debate

ROUND TABLES

Panels of experts and professionals discussing new pushing topics in the sector

- Future assessments in the Humanitarian sector
- Local Technical Communities
- Coordinated Data Scramble
- Data protection and responsibility
- Drones in Humanitarian action
- Response-effectiveness of new analysis tools

SPEEDGEEKING LIGHTNING TALK

Dynamic space in which project managers can present their ideas and discuss them with the interested public, creating a space of experimentation.

We want to hear about your project!
Send us your proposals!

WORKSHOPS

Discover more about innovative tools as well as data management's essentials during hands'on workshops, including

- Advanced OSM
- Webmapping tools
- Data analysis and visualization
- XLS forms
- QGIS basics
- Etc.
