

Technical Local Communities

Supporting the development on an OSM
Community in Madagascar

Why ? What ?

Why ? What ?

- ❯ No money for developing activities = not an organization
- ❯ A human resource center for geographical information activities
- ❯ Sustainable ecosystem
- ❯ Accessible
- ❯ Inclusive

OSM MG

- 👤 Local Partner : AUF
- 👤 Infrastructure and Wi-Fi available : simple but crucial
- 👤 In the campus
- 👤 2x1 week of training (15+50 persons trained) + 1 open event
- 👤 Ethics important
- 👤 Global environment ; potential of OSM

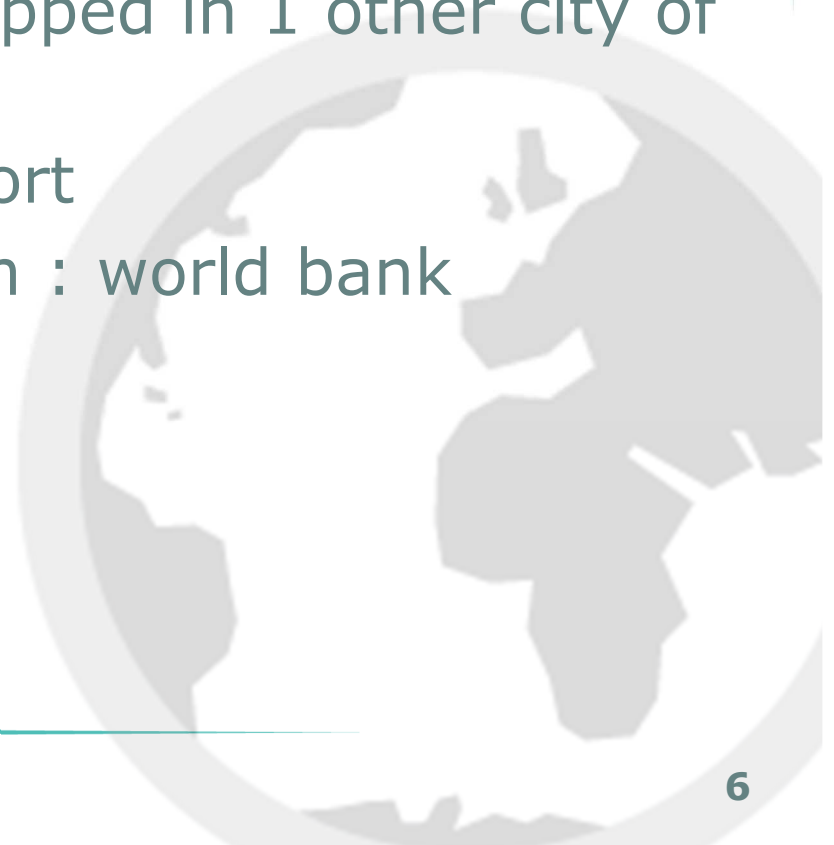

A few pics

Now

- 👤 A grown community : developped in 1 other city of Madagascar
- 👤 A need for data quality support
- 👤 Local actors in the ecosystem : world bank

Challenges for interaction

- 👤 Finding the right contact > a visible and transparent community
 - Specific tools if no communication is reachable
- 👤 Finding the right way of interaction > paid volunteering for short data collection needs? Paid local staff with free and open trainings? ...
- 👤 Capacity building through specific needs / projects

Thanks for your attention !
